

*Pinnacle 21 is an established startup that builds software to streamline the drug approval process, bringing life-saving medicines to patients faster.*

## Integration Lead

At Pinnacle 21, we are always looking for exceptional team members. Our company and team are still in its earlier stages, meaning you will be crucial to shaping the future of the company's data analysis systems and processes. As we plan to make a lasting impact on the pharmaceutical industry we're looking for a motivated member to take part in fostering one of the top companies in Philadelphia!

**Work that matters** Our teams work with the pharmaceutical industry to streamline the drug approval process, bringing life-saving medicines to patients that need them. We need to ensure everyone is informed, educated, and in sync to allow for a seamless and collaborative work experience.

**Work autonomously** Enjoy an autonomous environment, where we'll support your continuous improvement and foster your capabilities to manage ownership of multiple areas and projects in order to continually grow your skillset.

**Global footprint** We support a community of users from countries across the world that widely regard our software as the industry standard for clinical submission preparation.

## What you'll be doing

The nature of our product requires constant maintenance of our integration suite and its connections with our end-user's unique systems and processes. Our Integration Lead will be responsible for the technical ownership of this area as we aim to elevate the partnership for our customers. You will be encouraged to exceed expectations, which is a requirement to succeed in a small team that is constantly working on new challenges. You will be responsible for the roadmap and delivery of all integration capabilities, both inbound and outbound. You will have a chance to research new technologies if they are the best solution to a problem, but you will also be expected to learn and use existing solutions when it makes sense.

## What we're looking for

### Must

- Have 10+ years of experience writing server-side code (Java/Play framework)
- Have 5+ years of experience with RESTful API design and development
- Have experience in at least one other general-purpose programming language; including but not limited to Scala, Python, JavaScript, .NET, Ruby, etc
- Have the ability to write a web app from scratch
- Experience using version control (preferably, git)
- Be able to provide examples of previous work you are proud of
- Be able to write useful test cases
- Be smart, and get things done
- Be passionate about software development

### Plus

- Skills associated with technical product management
- Technical writing ability
- Experience providing developer support
- Write efficient SQL queries
- Experience building microservices

## A bit about us

Pinnacle 21 is a startup making a big impact on regulatory review processes. Our flagship software provides the biopharmaceutical industry with the key to a fast, efficient drug review process. It's this technology that drives FDA's 21st Century Review Initiative, ensuring that submission data is compliant, useful and ready for review — which enables a more efficient review process.

At the core of our company is our open-source project called Pinnacle 21 Community. We support users from the FDA, PMDA (Japanese Pharmaceutical Regulatory Agency), and almost every pharmaceutical company preparing a clinical submission. Building on top of this wide network, we continue to expand into new opportunities and grow our business.
