

*Pinnacle 21 is an established startup that builds software to streamline the drug approval process, bringing life-saving medicines to patients faster.*

## Software Test Engineer

At Pinnacle 21, we are always looking for exceptional team members. Our company and team are still in its earlier stages, meaning you will be crucial to shaping the future of company's Quality and Compliance systems. As we plan to make a lasting impact on the pharmaceutical industry we're looking for a motivated member to take part in continuing to foster one of the top companies in Philadelphia!

**Work that matters** Our teams work with the pharmaceutical industry to streamline the drug approval process, bringing life-saving medicines to patients that need them. We need to ensure everyone is informed, educated, and in sync to allow for a seamless and collaborative work experience.

**Work autonomously** Enjoy an autonomous environment, where we'll support your continuous improvement and foster your capabilities to manage ownership of multiple areas and projects in order to continually grow your skillset.

**Global footprint** We support a community of users from countries across the world that widely regard our software as the industry standard for clinical submission preparation.

## What you'll be doing

Our Test Engineers ensure that our products match the high quality expected by our clients. You will work to automate our test cases where appropriate and design the frameworks needed to create functional and integration tests. We'll look for someone with a track record of taking pride in owning the quality of the application as well as the Testing unit itself, ensuring to guide other test engineers in their efforts and organize manual testers. You'll be expected to track test coverage metrics and prioritize testing gaps. You will be encouraged to exceed expectations, which is a requirement to succeed in a small team that is constantly encountering new challenges.

## What we're looking for

### Must

- Have 4+ years of professional experience testing applications
- Have experience in at least one general-purpose programming language (Java, .NET, Python, etc)
- You should be able to analyze requirements and advise developers that don't have clear documentation
- Have wide knowledge of testing frameworks and determine which is best to use for a particular project
- Have experience organizing test suites
- Be able to lead a team and organize projects
- Have experience using version control (preferably, git)
- Be able to provide examples of previous work you are proud of
- Be able to write useful test cases
- Be smart, and get things done
- Be passionate about software development

### Plus

- Have a strong understanding of web design and user experience
- Have experience working in an Agile Scrum process
- Have experience writing SQL queries
- Have experience working with CircleCI

## A bit about us

Pinnacle 21 is a startup making a big impact on regulatory review processes. Our flagship software provides the biopharmaceutical industry with the key to a fast, efficient drug review process. It's this technology that drives FDA's 21st Century Review Initiative, ensuring that submission data is compliant, useful and ready for review — which enables a more efficient review process. Our Great Place to Work certified workplace is constantly looking for new, motivated team members to come help us revolutionize clinical trials.
